

**ABSTRACT OF THE INVENTION**

The present invention relates to disposable absorbent garments including a liquid barrier layer, a stretchable carrier layer, an elastic layer attached to the stretchable carrier layer and an absorbent section. The disposable absorbent garments include a front waist region, a back waist region and a crotch region that connects the front waist region and the back waist region. The front waist region, the back waist region and the crotch region each have a width in a lateral direction of the garments. The stretchable carrier layer has a width in the waist regions of about the width of the front waist region and the back waist region and a width in the crotch region of about the width of the crotch region.
